- 4 PETER THOMAS**  
In an exclusive HIFICRITIC interview, the co-founder of PMC recalls his early days at the BBC and the beginnings of the company, and gives his views on the state of speaker design and the hi-fi industry
- 9 STAN'S SAFARI**  
Stan's been spending his time in isolation tinkering with some vintage amplifiers in his collection – and pondering elements of their design and construction
- 11 MOLA MOLA TAMBAQUI**  
Yes, the name's unusual, being derived from a giant sunfish, but then so is this DAC, designed by company founder Bruno Putzeys and with a sound that captivates both Andrew Everard and Martin Colloms
- 13 THE 'A' TEAM**  
Martin Colloms compares three compact speakers – from Amphion, Aurender and ATC – and discovers that not only is the design thinking for each very different, but they also deliver a variety of presentations
- 20 MICHİ P5/S5**  
First launched by Rotel as its premium brand back at the beginning of the 1990s, Michi is back with a very different look, and an initial offering of a preamplifier and two power amps. Andrew Everard suggests the P5 preamp and S5 stereo power amp could be a taste of great things to come
- 23 ALL YOU REALLY NEED TO KNOW ABOUT DIGITAL FILTERS**  
Usually one of the hidden aspects of the handling of digital data, filtering can have a significant affect on how a DAC sounds. Keith Howard examines the common types, and explains why they matter
- 28 IFI AUDIO AURORA**  
No other all-in-one network audio system looks quite like it, and the British-based company's latest arrival features a slew of unique technologies, including all-analogue room optimisation. And it's more than just a looker: it sounds spectacular, too
- 37 THE NEW NORMA?**  
Chris Kelly finds much to like Norma Audio's CD player/DAC and integrated amplifier, and says the brand should be more celebrated

- 33 NETWORK CONNECTIONS**  
Martin Colloms, Andrew Everard and Steve Harris examine a trio of 'audiophile' Ethernet switches, and a bushel of network cables
- 40 KLIPSCH FORTE III**  
Part of the company's Heritage series, this impressive speaker combines classic horn technology with some modern thinking
- 42 REGA AETHOS**  
Slotting in between the British company's Elicit R and Osiris, this integrated amplifier is much more than a gap-filler, says Ed Selley
- 44 AUDIO NOTE MEISHU TONMEISTER**  
The latest iteration of this classic valve amplifier more than lives up to its name, according to a delighted Chris Frankland
- 46 NEAT MINISTRA**  
Drawing on technology from across its manufacturer's range, this compact speaker delivers a powerful, yet refined, sound
- 48 PSB ALPHA S10**  
Compact and very affordable, this active subwoofer finds a fan in Kevin Fiske
- 50 CHORD ELECTRONICS 2GO**  
Building on the success of the Mojo/Poly, this tiny streamer turns the Hugo 2 into a complete player. It's great, but its control app grates on Jon Honeyball's nerves
- 52 STREAMING AMPLIFIERS**  
A trio of network-connectable amps – Arcam's SA30, the Cyrus ONE Cast and Marantz's PM7000N – shows there's more than one way to integrate streaming without affecting audio performance
- 58 CLASSICAL**  
Andrew Mellor surveys the latest classical releases, from Adès to Wagner
- 60 JAZZ AND MORE IN DSD**  
James Parker explains why the technology behind SACD was made for jazz
- 62 SECONDHAND STARS**  
Steve Harris reveals his latest haul of 'pre-loved' recordings
- 64 SOUNDSTAGE**  
Former Naim chairman Paul Stephenson on early musical influences, and rediscoveries

*Rotel's Michi brand is back with a very different look, and a highly competitive sound – p20*

*These 'cat's-eyes' are at the heart of the iFi Audio Aurora's all-analogue room optimisation system – p28*

*Can a network switch such as the English Electric 8switch really affect streamin performance? We listen and consider – p33*

*The Marantz PM7000N meets its streaming rivals – p52*
